

**ePrescribe Florida  
Vendor Registration Clinical Scenario for Verification**

Please prepare a web demo specific to the following clinical scenario. You will be allotted 30 minutes to complete this scenario.

**Patient information:**

Joe Florida  
DOB: 1/1/1950  
Gender: male  
Insurance: 3 tier formulary  
Allergy: Penicillin  
Medication History:  
    Digoxin .25mg 1qd #30 – (tier 1)  
    Warfarin 5mg 1qd #30 – (tier 2)  
    Nexium 40mg 1qd #30 – (PA drug)  
    Atenolol 50mg 1qd #30 – (tier 1)

1. Patient lookup: Please demonstrate patient lookup capabilities for Joe Florida
2. Joe Florida presents with cough, fever and chest congestion. You the prescriber have diagnosed him with a serious respiratory track infection. You prescribe the following medication:
  - Biaxin 500mg q12H for 7 days
3. Interaction warnings appear, so you change the medication to Levaquin (non-preferred drug) 500mg qd for 10 days.
4. Due to formulary and drug interactions and your concern for Mr. Florida, you cancel these prescriptions and administer Rocephin 1000 mg IM (lot number 11122).
5. While Mr. Florida is in your office, he expresses a need to have his routine medications refilled. Refill all routine medications in Medication History and include 3 additional refills. Please select the pharmacy favorite for Mr. Florida.
6. If a formulary warning appears during refill renewal process, please select a tier 1 formulary alternative.
7. Demonstrate access to transmission/error reporting for communication with pharmacies.
8. Demonstrate inbound renewal request from pharmacy
9. Demonstrate access to locally generated reports by prescriber.

Thank you for taking time to prepare this clinical scenario demonstration.
